Using the Archive

FTSpooler keeps all the job processing and delivery information in one job archive, and provides different views, i.e. **All, Delivered, Errors, Data, Replication, Formatting, Working, and Logs**.

Archive shows three panels: **searching and filtering, main panel and detail panel**.

[More information on Archive Database](#)

View Logs

Select the **Logs** button under **Archive** from the top navigation bar. In the **searching and filtering panel**, specify searching criteria to retrieve data records.

[More information on Search and Filter Archive Records](#)

In the **main panel**, FTSpooler shows the general dialog, but not information about a particular job. It provides additional information for troubleshooting processes.

A full description of the selected activity is shown in the **detail panel** located at the bottom of the window.
