FTSpooler Setup

Core Components

FTSpooler **Core components** shows the versions and locations of all the FTSpooler essentials. Locations of forms, substitution files and rule files can be changed under **Home folder**.

Home Directory (%fthome%): is shown for information. It cannot be changed on this screen, but can be changed by first stopping the FormTrap Spooler then using program **FTHome Locator** (access via **Start > Programs > FormTrap > Server V7**).

Note: If changes to queues disappear when you stop the FormTrap Spooler, please see:

[Access rights with FormTrap Enterprise Version 7](#)

Install directory (%ftinst%): is shown for information, it is the location of your FormTrap executable files and cannot be changed.

In **Formatting** section, specify **Location of forms and substitution files**, normally **%fthome%\data**.

In **Identification and split** section, specify the **Location of rule files**, normally **%fthome%\rules**.

The screenshot shows the 'Core Components' tab of the FTSpooler Setup dialog. The left sidebar lists various setup categories: Connection, Queues, Data folders, Archive, Setup (selected), Core components (selected), Archive, Settings, Filters, Run, Users, Data input, and Delivery. The main area displays the following information:

- Core components**: 7.5.001. Version 7.5.001.
- Home directory (%fthome%)**: C:\fthome\v7
- Install directory (%ftinst%)**: C:\Program Files\TCGIS\FTSpooler\7-Server\
- Formatting**:
 - Version: 7, 2, 0, 4
 - Location of the forms: %fthome%\data
 - Location of the common substitution files: %fthome%\substitutions
- Identification and split**:
 - Version: 2, 0, 9, 0
 - Location of rule files: %fthome%\rules
- Page normalisation (repagination)**:
 - Version: 2, 1, 0, 4

At the bottom, there are 'Save' and 'Restore' buttons.
