Manage Data Folders

Data folders store the expanded contents of your FormTrap load (.ASC) file, created in FTDesign as well as rule files and substitution files. The contents include the form(s) definitions and data related to front and printer handling used by the formatting processes.

Create a Data Folder

To create a new data folder:

- Select Data folders from the top Navigation Bar.
- Click the New Folder button. The Data Folder dialog box pops up.
- Enter a Folder Name, for example, formtrap.
- The **Use private substitution files for this data folder** option permits the data folder to have its own substitution files instead of the common substitution files.

More information on Add a Substitution File

• Click OK.

Eolder Name:	OK
formtrap	Cancel

• The dialog box pops up to allow you to locate the load (.ASC) file.

My Computer	File <u>n</u> ame:					<u>O</u> pen
My Network	Files of type:	Load files (*.asc)				Cancel

• Choose the load (.ASC) file to add and click **Open** to finish the reloading process. Forms within the load (.ASC) file are added to the data folder.

Top Reload the Forms of the Data Folder To reload the data (.ASC) file to the data folder:

• Select either the data folder name i.e. **formtrap** in our example or **Forms** underneath.
