Getting Started	Setting up the Design Workspace 🕺 PDF version
The Design Workspace	
Design Workspace Setup	All OMR forms have a timing track, a row of black boxes on the long edge of the page, that is scanned by the form reader to determine where response positions can be found. Scan From Image forms instead use "Tombstones" or black marks at the extremities of forms.
Prepare your workspace	
Paper Size	
Page Orientation	At each timing track the OMR looks horizontally across the page for marks to see of a response has been filled in. The information collected from the responses is then translated by the reader according to the zone the response is in, and the responses on the form can then be interpreted.
Double sided printing (Duplex)	
Tombstones	
Grid	on the form can then be interpreted.
Custom Grid Definition	FoD-OMR automatically sets the timing track and response positions according to the settings for your reader. The position of the timing track on the page is determined by the page layout.
Scan from Image Forms	
Response Grid	
Manual Timing Marks	To change the form's orientation and set up the response grid or tombstones:
"Fat" Response Shape	Select Page Setup from the File menu.
Blind and Other Colors	Page setup Paper: A4 Grid: 48 channels Orientatio AB channels Portrait (Option 25 Image: Compared and the set of t
