The "Fat" Response Shape

PDF version

This shape is intended for single responses that are not in adjacent channels and is excellent for single choices, including on B&W Laser Printers. The shape extends vertically outside the scan line and horizontally outside the channel and with reasonable alignment works very well even on B&W Laser Printers. The **Tea with Milk** choice has the normal "sparse" response shape inside it for comparison, Timing Line height is 19/300th.

Hot Drink		Hot Drink	
	Tea, black		Tea, black
	Tea with Milk		Tea with Milk
	Coffee, black		Coffee, black
	Coffee, white		Coffee, white
	Hot chocolate		Hot chocolate
