## Tool Buttons

[PDF version](#)

The FoD-OMR window has four main toolbars for quickly accessing commands. The Standard toolbar has functions for saving, loading and printing forms and the edit tools.

The Draw toolbar has functions for placing response zones, text, graphic objects and pictures.

The Formatting toolbar has functions for changing the style of text.

The Tools toolbar has special functions for aligning, nudging and viewing objects.

From the Tools toolbar you can open the Zoom and Align toolbars. By default they are floating, but can be docked in the toolbar area.
