## Working with Graphics

There are a number of graphic elements in FoD-OMR that will allow you to design your form.

## Preparing your workspace via Options

Before beginning a form design session, it is recommended you set up your workspace to help you with form design. **Tools**, **Options** provides this facility, with **Preferences** tab providing access to preferred **Measurement units**.

| Options             |                                                                                                                 |        |
|---------------------|-----------------------------------------------------------------------------------------------------------------|--------|
| Preferences Folders | Custom mask                                                                                                     |        |
| Measurement units:  | inches 💌                                                                                                        |        |
|                     | millimeters<br>centimeters<br>inches<br>points (1/72 of inch)<br>picas (1/6 of inch)<br>300 dpi (1/300 of inch) |        |
|                     | ОК                                                                                                              | Cancel |

Select your preferred measurement from the Measurement units list.

For fine design, we prefer 1/300th of an inch measurement.

**Folder** gives access to the standard paths for Forms, Pictures and Logos and Data files where you are populating your OMR forms with data.

| Preferences Folders Custom mask                                                         |
|-----------------------------------------------------------------------------------------|
| Form definitions:                                                                       |
| C:\Program Files\TCGIS\Flips AB version\Examples                                        |
| Pictures, logos:                                                                        |
| C:\Program Files\TCGIS\FTDesign\Pictures                                                |
| Input data files:                                                                       |
| C:\Program Files\TCGIS\OMR-Scantron\Examples                                            |
| OK Cancel<br>Custom masks provide for setup and maintenance of any standard masks, used |
| for incoming data presentation, and are discussed in that section, see Custom Masking.  |
