Working with Graphics	Graphic Objects - Text	📆 PDF version
Preparing your Workspace Creating Graphic Objects Lines Rectangle Ellipse Text Barcode Picture Constrained Handprint Arranging Graphic Objects	Each text object on a FoD-OMR form is contained within a <i>tex</i> alignment and orientation of the text is calculated.	<i>t frame</i> , from which the
	Adding text/Definition tab	
	To add a text object to a form, select the Text T tool buttor frame on the form. The Text Object dialog box opens.	and draw the text
	The definition tab contains the actual text that appears in the f for linking to fields in a data file.	rame as well as tools
	FoD-OMR has a powerful feature that integrates information f your form. The source of your text object can be either <i>fixed</i> (Definition tab is constant for each form) or can be linked to fi (such as application or spreadsheet output).	rom data files into the text from the elds within a data file
	To extract information from data files, you link text from the de data fields. This feature is fully discussed in Merging data from	finition tab to external files.
		Тор
	Format	
	From the Format tab, you can set the properties of the text w Alignment is the position of the text relative to the frame. Tex aligned to the left, center and right, but also to a decimal point	thin the text frame. t can be horizontally
	Che Mator Two Mator Three Mator Vehicle Vehicles Vehicles Vehicles Aligned to the left horizontally and to the center vertically.	
	Aligned to the Aligned center vertically and horizontal horizontally. center	to the right ly and to the vertically.
	One Motor Two Motor Three Motor One Motor Two Mo Vehicle Vehicles Vehicles Vohicle Vehicle	tor Three Motor
	When decimal alignment is selected, the text is aligned to the line. See blow for an example. 12.34 54.66 13553.44 674.70 3.14159 For text frames that contain large amount of text, you can set word wrap properties from the frame, as well as the distance	first decimal point in a the line spacing and of the Tab stop.
