Working with Graphics	The Object Grid
Preparing your Workspace Setting Object Grid Nudge Distance Adjusting the Zoom Creating Graphic Objects Arranging Graphic Objects	As well as the response grid, made up of the response positions on the form, FoD-OMR also has an object grid. When enabled, the object grid sets the points at which a resized or drawn object 'snaps' to the grid. We strongly recommend an object grid for from-Image forms. Setting up the Object Grid
	To set up the object grid, select Object Grid from the Tools menu.
	Grid ? ≥ Origin 0K Horizontal: 0.00 (300 dpi) Vertical: 0.00 (300 dpi)
	Align with DMR-grid Spacing
	Horizontal: 150.00 (300 dpi) + Vertical: 150.00 (300 dpi) +
	You can set the precise offset of the origin (top-left corner) of the object grid and the grid spacing. For manipulating OMR objects and their frames, set both Align with OMR Grid and Half of OMR Grid.
	grid button to enable the object grid.
