### Masking & Font Change

Masking

▶ Replacing Fonts

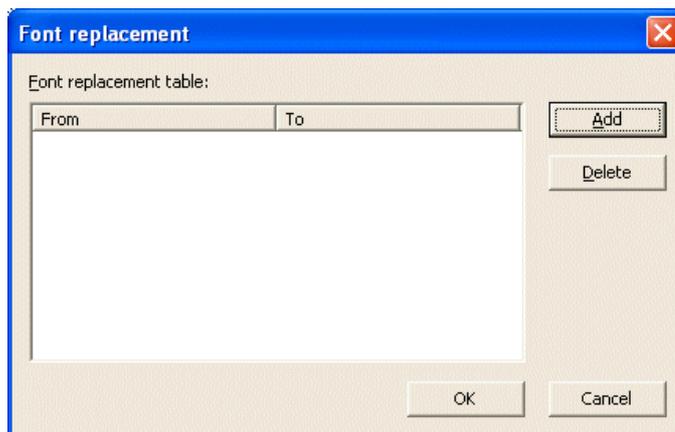

#### Special Mask

FTDesign provides the function to replace fonts used in your form. It is a convenient way of making global changes to fonts used in the form. This saves you from manually changing each instance of a font.

How to replace fonts

To replace fonts:

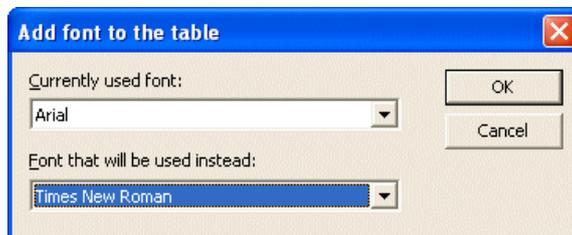

- Select **Replace Fonts** in the **Tools** menu.
- In the **Font replacement** dialog box, click the **Add** button.

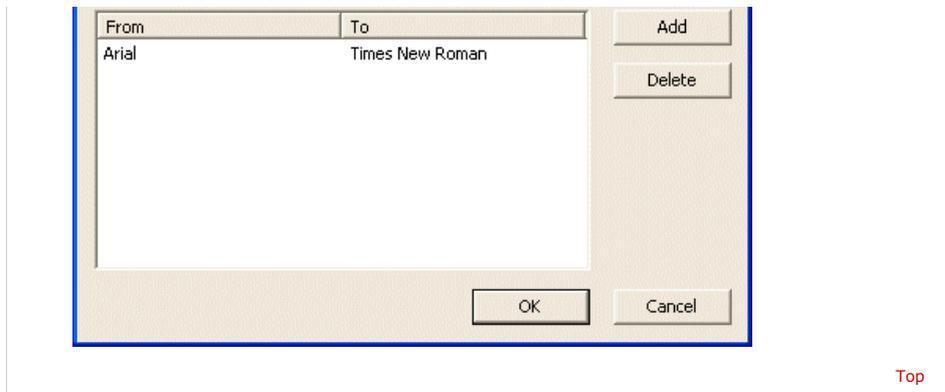

- In the **Add fonts to table** dialog box, choose from the **Currently used font** list the font to replace.

- Choose the font you wish to exchange to from the **Font that will be used instead** list. This list contains all available fonts.

- Click the **OK** button to add the chosen conversion to the Font replacement table.
- Click the **OK** button in the Font replacement dialog box to make the changes.
