FTSpooler Setup

PDF version

File System

This option allows the user's application or a copy statement to write a file directly to the queue folder.

To configure the file system option:

- Tick the **Enable** at **start-up** checkbox to enable the file system option at FTSpooler start-up.

  ⊘ You need to restart FTSpooler for this to take effect.

- Alter the location of the **Folder being watched** if required.
- Click the **Save** button.

Start or **Stop** the (File System/LP/Named Pipes) input service and check **Current state**. Input service will only display if the **Current state** is **Ready**.
