## FTSpooler Setup

PDF version

### Printer Licensing

FTSpooler is licensed to a given number of printers.

Install either a local or network PCL or PCLXL (PCL6) or PostScript printer to the system. The printers list is determined by the printer servers added to FTSpooler. If you have the "Print to ANY Windows Printer" option installed, you may tick other printers and will require a filter to print to them.

[More information on Print to ANY Windows Printer](#)

[More information on Printer Servers](#)

To configure printer licensing:

- Check the printers in the list that you wish FTSpooler to print to, up to the maximum number of licensed printers.
- Click the **Save** button.

Printer selection is modified, but not saved
