View Logs

Select the **Logs** button under **Archive** from the top navigation bar. In the **searching and filtering panel**, specify searching criteria to retrieve data records.

More information on Search and Filter Archive Records

In the **main panel**, FTSpooler shows the general dialog, but not information about a particular job. It provides additional information for troubleshooting processes.

A full description of the selected activity is shown in the **detail panel** located at the bottom of the window.

The screenshot shows the 'Archive' section of the software interface. At the top, there is a navigation bar with icons for Connection, Queues, Data folders, Archive, and Setup. Below this is a sub-navigation bar with buttons for All, Delivered, Errors, Data, Replication, Formatting, Working, and Logs. The 'Logs' button is selected. On the left, there is a 'Searching and Filtering panel' with a 'Date range' section. It has a 'From' section with a date of 9/09/2008 and a time of 11:18:10 AM, and an 'To' section with a date of 16/09/2008 and a time of 11:18:10 AM. The main area displays a table of logs with columns for Date, Time, and Description. The table contains several entries, with the last two entries highlighted. The first highlighted entry is 'Service started, home: [C:\fthome\v7\]' and the second is 'Cannot execute startup process: [path], code...'. Below the table, there is a 'Detail panel' showing the text 'Service started, home: [C:\fthome\v7\]'. At the bottom right of the screenshot, there is a 'Top' button.
