- ▾ Manage Data Folders
- **Manage Substitution Files**
- Manage Split Rules Files

folder may use either its own private substitution folder or a single public substitution folder.

#### Add a Substitution File to the Data Folder

To add a substitution file to the data folder:

- Select **Substitutions** in the tree structure, either at root level (public) or within a specific data folder (private). To see a private substitutions folder, the option **Use private substitution files for this data folder** must be checked in **Data folder** properties.

##### **More information on Update the Properties of a Data Folder**

- Click the **Add Substitution Files** button.
- The dialog box pops up to allow you to add the substitution file(s).

- Select the substitution file(s) to be added and click **Open** to finish the process.

**Note:** Text files must be stored in Unicode, in Notepad select **Save as**, **Encoding** and **UTF-8** from the drop down list.
