Queue Setup

- ▶ [What is a Queue](#)
- ▶ [Create a Queue](#)
- ▶ [Delete a Queue](#)
- ▶ [Queue Properties](#)
- ▶ [Print to ANY Windows Printer](#)
- ▶ [Tools](#)

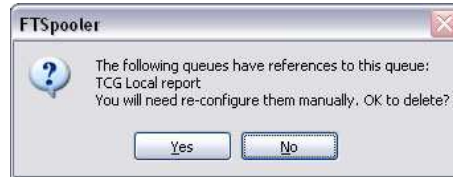

Delete

Deleting a queue also removes link(s) to other queues, requiring manual reconfiguration if the deleted queue is referenced.

Delete a queue

To delete a queue:

- Select the queue(s) to be removed.
- Click the **Delete** button, or right click the queue(s) and select the **Delete** option.
- A dialog box pops up to confirm the deletion process. Click **Yes** to finish (or **No** to fix the listed queue(s) first).
- If the queue is in used in any other queue(s), reconfigure those queues manually.

Write down the queue names indicated and fix them immediately.
